Mr. Sam Tapson
City of Morrison
200 West Main Street
Morrison, Illinois 61270

Dear Mr. Tapson:

This letter is to confirm our telephone conversation of June 24. The United States Environmental Protection Agency has assessed the need for a removal action at Morrison Well No. 3, and evaluated the installation of an air stripper. Initial sampling of Well No. 4 showed unacceptable levels of lead (430 ppb). However, subsequent analysis show lead in a more acceptable range (7.7 ppb; the drinking water standard is 50 ppb lead). These analyses indicate that the water from Municipal Well No. 4 is acceptable for use according to the Safe Drinking Water Act.

If we can be of any further assistance, please contact me at (312) 886-3601.

Sincerely,

Verneta Simon, On-Scene Coordinator
